Profile

I am a highly driven individual that has vast experience of being able to cope with a high level of responsibility throughout my nine years with Mitie. My current role has two main responsibilities; electrical engineering/maintenance and client relationship management. I am the company representative across the entire northwest for one of Mitie's largest contracts and responsible for the physical upkeep of the maintenance whilst keeping the client happy.

I am looking for a new challenge that I can progress, develop and widen my skills.

Experience

MOBILE ELECTRICAL ENGINEER – MITIE – 2010-PRESENT

During my time with Mitie on a Network Rail contract, I have obtained various skills and a vast knowledge base of electrical engineering/maintenance, plumbing, air conditioning and general fabrication works. Thinking outside the box, providing solutions and personally carrying out repair works on electrical systems, plumbing systems, AC units and general building fabrication.

Working with Mitie and Network Rail, we pride ourselves with being health & safety compliant. Operating on an approachable close call system we strive to ensure everything is safe and work to amend any breaches as soon as physically possible.

Digital tools used to help me utilise my role within the workplace are PDA's, online timesheets and work forms. The work I carry out here are periodic maintenance inspections/repairs and also reactive work which is based upon on-the-spot repairs which is made easier to manage with the use of my PDA.

I have developed a strong work ethic due to mainly working independently. This entails being able to manage jobs, prioritise work and ensure the client is satisfied whilst being left unsupervised.

I also work on a call out basis, on top of my regular hours, providing 24/7 services on a rota with my other colleagues.

Qualifications and awards

- level 3 NVQ electrical installation
- 17th/18th edition
- Level 2 F Gas category 1

- LV electrical awareness
- PASMA
- IPAF
- Step ladder training
- Asbestos awareness
- Legionella awareness
- Various health and safety training courses
- In-house regular training provided by Mitie
- 4 mitie star certificates and badges for overachieving

Personal interests

Personal interests include aiding with my family business of home development, including general handy work, basic plumbing, DIY and structural alterations.

I have a passion for keeping healthy and regularly climb mountains and countryside walks with my dog, River. Also, I have a full motorbike license and enjoy taking week-end bike trips.

I am a keen snowboarder and have been since 8 years old. I am also musically minded and when I get spare time I love to pick up my guitar and practice.

Skills

- Electrical engineering and installation
- Plumbing repairs and installation
- Air conditioning maintenance and repairs
- General fabrication works
- Utilising digital technology to aid in my work
- Dealing with multiple jobs at once and seeing them through from start to finish
- Dealing with clients on a personal level and meeting their needs

- Providing quotes to clients that require additional extra works
